Personal Statement

An ambitious, innovative and passionate software developer with a background in Computer Science. I have a user-centered approach to work which has proved fruitful over time.

Highlighted Software Application

Clearance system

URL:https://github.com/ChristineWambui/Kristie.git

A web application for clearing students before graduation

- Implemented authentication system for both students and administrators in charge of clearing them
- Used bootstrap4 and CSS for the frontend and PHP and SQL for the backend

Booking Beauty Services System

URL: https://github.com/ChristineWanjau/book_beauty.git

This is an ongoing project

A web application for booking and managing beauty services appointments

- Implemented authentication
- Incorporated HERE map location API

Twitter Data Mining tool

URL:https://github.com/ChristineWanjau/matatu.git

This is project which mines tweets from twitter relating to issues affecting our citizens in transport.
It is a web application written in django and uses libraries such as tweepy and nltk (natural language tool kit).
It also uses dash and chart.js for visualization.
This was a hackathon project where I was fourth place in the competition.

Flutter E-commerce App

URL:https://github.com/ChristineWanjau/ecommerce-app.git

This is a project which shows a User Interface of an e-commerce app written in flutter.

Basic functionality works though it is yet to be connected to the database.

Technical Skills

Strong: PHP, HTML, CSS, Bootstrap, Django, Python

Personal Skills

- Keen to learn new technologies within a short period of time and build upon existing skills
- Team work and strong communication skills, able to communicate and interact with people around me
- Ability to work with minimal supervision
